

Repair Kit Instructions

Repair kit contains:

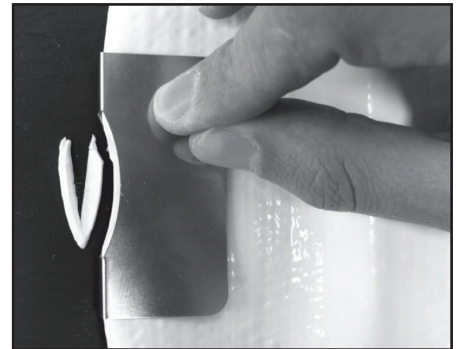

- 1 x template (fig 1)
 - 2 x fixing crew (fig 2)
 - 1 x top repair plate (fig 3)
 - 1 x bottom repair plate (fig 4)
- (Work knife and screwdriver not included).

1. Locate the damaged area

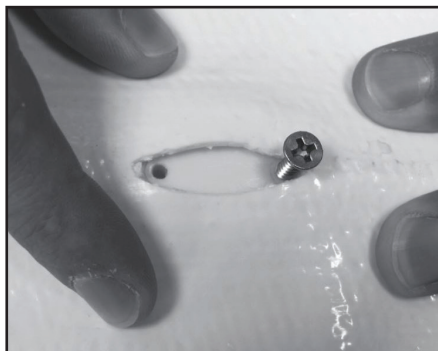

2. Place the template over the centre of the damaged area.

3. Lay flat on a cutting board and use a sharp work knife to cut out the area.

4. Insert the bottom repair plate with a screw in to place.

5. Position so that you can see both guide holes on the bottom repair plate.

6. Push the tube together to hold the bottom repair plate in place and remove the screw.

7. Place the top repair plate over so that the two guide holes line up. Replace the two screws then tighten with a screwdriver to complete the repair.
